Field Level Cabanas: Seating Solutions partnered with UCF this summer to develop the nation's first field level cabanas. UCF received eight VIP Field Cabana's in their endzone. This idea was created with Seating Solutions owner and lead designer, Scott Suprina in coordination with UCF's athletic department. With normal field level access being standing passes, Field Cabanas give VIP's access and comfort never experienced before.

University of
Central Florida

With the late summer and early fall Florida sun present, it was important that these cabanas provide a relaxing environment. Each cabana features its own motorized retractable awning that can roll in or out with a press of a button. These awnings keep the entire cabana shaded. In addition each cabana is outfitted with DreamSeat furniture package. They feature two pub tables with logo, six DreamSeat Barstools and our outdoor cabana furniture package.

Additionally provided by the University is an outdoor TV in each cabana as well as a full size cooler for beverage convenience.

Seating Solutions and UCF have already begun to discuss installing cabanas in the other endzone for the 2018 Football Season.
